

DURAFORM EX

Elongation at break 47%

DAVINCI development is the only service bureau in the world who creates durable, high-quality, testable parts on Sinterstation HQ HS SLS system with the brand new Duraform Ex material.

DuraForm® Extreeme are next-generation nylon materials, developed specifically for creating rugged engineering thermoplastic parts that withstand extreme aggressive functional testing.

The material was introduced in December by 3D Systems on Euromold 2005. Since oktober DAVINCI development have been running the material in our Sinterstation HQ HS

With Duraform Extreem Prototypes for Form, fit/snap-fit, and extreeme functional testing.

DAVINCI development is one of the leading RPT service bureaus in Scandinavia. We have invested in a broad range of technologies, and continually invest to ensure we meet the changing needs of our clients.

We supply various materials from our SLA Viper, Polyjet, Zcorp or SLS Sinterstation HQ HS - contact us at +45 7650 2850
